#### Academic Project:

**Title: Employee Management System In An Organization.**

TeamSize:5

Environment: Python, Django

Project Description:

In any organization such as schools, colleges, companies, industry, etc. Certain number of employee's are employed. Managing this type information by just simply note down them in a dairy is a tedious task to do. So in order to manage employee's details some automation is required. Employee Management which includes automated management of an employee's attendance payroll activities based on attendance, gratuity, and provident fund and generates Salary slip. This reducing large amount of paper work. This software is built using PYTHON, DJANGO and MYSQL for database.
